GETAHUN GUADIE MAMO

Full-Stack Web Developer & Electrical and Computer Engineer

Addis Ababa, Ethiopia | Nationality: Ethiopian
+251 948 931 000 (mobile / WhatsApp) | aaron162103@gmail.com
Portfolio: portfolio-16210301.vercel.app
GitHub: github.com/Efo-Ysieni16210301 | LinkedIn: linkedin.com/in/getahun-guadie

PROFESSIONAL SUMMARY

Full-stack web developer with a Bachelor of Science in Electrical and Computer Engineering (industrial control) and more than five years of hands-on telecom engineering at Ethio Telecom. Self-taught in modern web development, with eight live, publicly accessible web applications built and deployed, including a multi-vendor marketplace with real payment processing, delivery tracking, authentication and an admin dashboard. Skilled in HTML, CSS, JavaScript, TypeScript, React, Next.js, Node.js and MongoDB. The engineering and networking background (routers, fiber, TCP/IP, power and uptime) gives a practical understanding of how data moves through real infrastructure and how to build reliable, fast, user-friendly applications. Applying for full-stack developer roles and for a Master's degree in Computer Science.

TECHNICAL SKILLS

Frontend	HTML5, CSS3, Tailwind CSS, JavaScript (ES6+), TypeScript, React.js, Next.js, Leaflet.js, responsive / mobile-first design
Backend & Data	Node.js, Express, Next.js server-side APIs, MongoDB, Firebase (Auth & Firestore), REST API integration, JSON, payment integration (Chapa and direct seller payment), GPS / geolocation tracking
Tools & Deployment	Git/GitHub, Vercel, Netlify, Render, VS Code, Chrome DevTools
Engineering & Networking	TCP/IP, VLANs, routers/switches, fiber and wireless networks, network fault detection and latency troubleshooting, power and backup systems (generators, UPS, battery banks), electrical power design software, maintenance planning

PROFESSIONAL EXPERIENCE

Field Operations Technician — Ethio Telecom

Nov 2020 – May 2026 · Gondar, Ethiopia

- **Power systems:** installed, maintained and troubleshot power supply systems for telecom sites (generators, UPS units, battery banks, power distribution); monitored voltage regulation and applied protective measures to keep backup power reliable.
- **Network infrastructure:** installed, maintained and repaired telecom lines and equipment (routers, base stations, fiber optics, wireless networks, security systems, internet connectivity) across copper and fiber networks, keeping services online for thousands of end users.
- Diagnosed and resolved network faults with monitoring tools and coordinated with IT/network teams, applying the same structured debugging mindset used to trace bugs in code.
- Designed and documented network infrastructure plans in line with industry standards, and ran quality assurance checks on installed equipment.
- **Customer and operational support:** resolved customer connectivity issues (voice, fax lines, broadband) and collaborated across teams to prioritise uptime and user satisfaction, which shapes a user-first approach to building web interfaces.

PORTFOLIO PROJECTS (LIVE DEMOS)

Nech Work — Marketplace & Delivery Platform for Ethiopian Goods — nechwork.vercel.app

Full-stack marketplace built as a single Next.js application and deployed entirely on Vercel, consolidated from a separate React frontend and Express API into one codebase. Customers pay in Birr or USD through Chapa, or pay the seller directly, and follow their order with GPS delivery tracking. Sellers list products through an admin-approval workflow with commission and payout tracking. Includes Google and email authentication, verified-purchase reviews, buyer–seller messaging, a bilingual (Amharic/English) interface, articles with comments and upvotes, and a full admin dashboard.

Tech: Next.js (full-stack), React, TypeScript, Node.js, MongoDB, Firebase Auth, Chapa, GPS tracking, Vercel

IMDb Clone — imdb16210301.vercel.app
Movie discovery app with trending and top-rated feeds, live search and dynamic movie detail pages, powered by a third-party movie database API.
Tech: Next.js, React, REST API, dynamic routing

Forkify — Recipe Search — fokify-16210301.netlify.app
Recipe search app using a public API with over a million recipes; supports bookmarking, serving-size ingredient scaling and user-uploaded recipes, persisted locally.
Tech: JavaScript (MVC), REST API, async/await, LocalStorage

Mapty — Workout Tracker — mapty-16210301.vercel.app
Logs running and cycling workouts on an interactive map using live geolocation, auto-calculating pace and elevation and saving every session locally.
Tech: JavaScript (OOP), Leaflet.js, Geolocation API, LocalStorage

Amharic Typing Speed Test — typing-16210301.netlify.app
Typing-speed trainer that tracks words per minute and accuracy in real time, supports custom practice text in any language, and exports score history to CSV/JSON.
Tech: JavaScript, DOM manipulation, LocalStorage, data export

Interactive Begena (Ethiopian Harp) Simulator — begenaupdate16210301.netlify.app
Bilingual (Amharic/English) instrument simulator with draggable strings, selectable audio tunings, and on-screen or keyboard play.
Tech: JavaScript, Web Audio, interactive UI, i18n

Instagram Clone — instagram-16210301.vercel.app
Full-stack social app with Google authentication, image posts with captions, likes and comments, and real-time direct messaging, backed by Firebase.
Tech: Next.js, React, Firebase Auth, Firestore, real-time chat

Google Search Clone — google-clone16210301.vercel.app
UI practice build (static sample results) recreating Google's homepage and results page with layout precision.
Tech: Next.js, React, CSS

EDUCATION AND TRAINING

BSc, Electrical and Computer Engineering (Industrial Control) — Woldia University Ethiopia · July 2019

- Final CGPA: 3.62 / 4.00 · EQF level 6 · Thesis: Design and simulation of a fuzzy logic controller-based washing machine
- Coursework and projects in automation, control systems, embedded programming, power systems, computational methods and object-oriented programming.

Self-Directed Training — Full-Stack Web Development

- HTML5, CSS3, Tailwind CSS, JavaScript (ES6+), TypeScript, React.js, Next.js, Node.js, MongoDB, Firebase, Leaflet.js; project-based learning with eight deployed web applications.

LANGUAGES

Mother tongue: Amharic

	Listening	Reading	Spoken prod.	Spoken interact.	Writing
English	C1	C1	B2	B2	C1
Ge'ez	C1	C1	B2	B2	C1

Levels: A1–A2 basic user; B1–B2 independent user; C1–C2 proficient user. English is also the medium of instruction at Woldia University.
