

GETAHUN GUADIE MAMO

Full-Stack Web Developer · React & Next.js · Frontend-Focused

Addis Ababa, Ethiopia | +251 948 931 000 | aaron162103@gmail.com | [linkedin.com/in/getahun-guadie](https://www.linkedin.com/in/getahun-guadie)

PROFESSIONAL SUMMARY

Frontend-focused full-stack web developer skilled in HTML, CSS, JavaScript, TypeScript, React, and Next.js, with a track record of shipping and deploying seven live, publicly accessible web applications. Currently deepening backend skills (Node.js, Firebase) to round out the stack. Brings a rare edge to the role: 5+ years of professional experience as a Field Operations Technician at Ethio Telecom, working daily with routers, fiber networks, TCP/IP, and system uptime — giving a genuine, ground-level understanding of how data actually moves, where latency comes from, and how to build web applications that are fast and reliable in the real world, not just in theory. Bachelor's degree in Electrical and Computer Engineering. Comfortable working independently, meeting deadlines, and communicating clearly with clients — habits built from years in a fast-paced technical support role.

TECHNICAL SKILLS

- **Frontend:** HTML5, CSS3, Tailwind CSS, JavaScript (ES6+), TypeScript, React.js, Next.js, Responsive/Mobile-First Design
- **Backend & Data (currently building):** Node.js, Firebase (Auth & Firestore), REST API integration, JSON
- **Tools & Deployment:** Git/GitHub, Vercel, Netlify, VS Code, Chrome DevTools
- **Systems & Networking (differentiator):** TCP/IP, VLANs, routers/switches, network performance & latency troubleshooting, power/backup systems for infrastructure reliability

PORTFOLIO PROJECTS (LIVE DEMOS)

IMDb Clone — imdb16210301.vercel.app/

Movie discovery app with trending and top-rated feeds, live search, and dynamic movie detail pages, powered by a real-time third-party movie database API.

Tech: Next.js, React, REST API, Dynamic Routing

Forkify — Recipe Search — fokify-16210301.netlify.app/

Recipe search app pulling from a public API with over a million recipes; supports bookmarking, serving-size ingredient scaling, and user-uploaded custom recipes, all persisted locally.

Tech: JavaScript (MVC), REST API, Async/Await, LocalStorage

Mapty — Workout Tracker — mapty-16210301.vercel.app/

Logs running and cycling workouts onto an interactive map using live geolocation, auto-calculating pace and elevation and saving every session to local storage.

Tech: JavaScript (OOP), Leaflet.js, Geolocation API, LocalStorage

Amharic Typing Speed Test — typing-16210301.netlify.app/

Interactive typing-speed trainer that tracks words-per-minute and accuracy in real time, supports custom practice text in any language, and keeps a score history exportable to CSV/JSON.

Tech: JavaScript, DOM manipulation, LocalStorage, Data export

Interactive Begen (Ethiopian Harp) Simulator — begenupdate16210301.netlify.app/

Bilingual (Amharic/English) interactive instrument simulator with draggable strings, multiple selectable audio tunings, and playable on-screen or keyboard controls — combining audio programming with cultural storytelling.

Tech: JavaScript, Web Audio, Interactive UI, i18n

Instagram Clone — instagram-16210301.vercel.app/

UI practice build (mock data, no live backend) featuring a sign-in flow, direct messages page, saved posts, and a personalized "Suggestions For You" feed.

Tech: Next.js, React, Component-based UI

Google Search Clone — google-clone16210301.vercel.app/

UI practice build (static sample results) recreating Google's homepage and search results experience pixel-for-pixel, focused on layout precision.

PROFESSIONAL EXPERIENCE

Field Operations Technician | **Ethio Telecom**

Nov 2020 – May 2026 • Gondar, Ethiopia

- Install, maintain, and troubleshoot telecom network infrastructure — routers, fiber optics, wireless links — and power systems (generators, UPS, battery banks) across multiple field sites, keeping services online for thousands of end users.
- Diagnose and resolve complex network faults using monitoring tools, applying the same structured, methodical debugging mindset used to trace bugs in code.
- Design and document network infrastructure plans, translating technical detail into clear documentation for cross-functional teams.
- Deliver direct technical support to customers, resolving connectivity issues efficiently — experience that shapes a user-first approach to building web interfaces.
- Gained first-hand insight into how data actually travels across real networks — knowledge now applied to building web applications that perform reliably under real-world latency and load conditions.

EDUCATION

BSc, Electrical and Computer Engineering — **Woldia University, Ethiopia**

Focus: Industrial Control • Final Grade: 3.62/4 (EQF Level 6) • Thesis: Design and Simulation of a Fuzzy Logic Controller-Based Washing Machine
